

Join us during the month of April!

CITIZEN SCIENCE MONTH

APRIL 2020

Turn your curiosity into impact with a citizen project.
Learn how your contributions can lead to new discoveries.

WHAT IS CITIZEN SCIENCE?

Citizen science is a collaboration between scientists and everyday people that helps accelerate research and discovery, from astronomy to zoology. SciStarter.org can match you to the right project based on your interests, location, and favorite activities. You can make an impact!

Citizen Science Month is presented by SciStarter and ASU with support from the National Library of Medicine.

FEATURED CITIZEN SCIENCE PROJECTS:

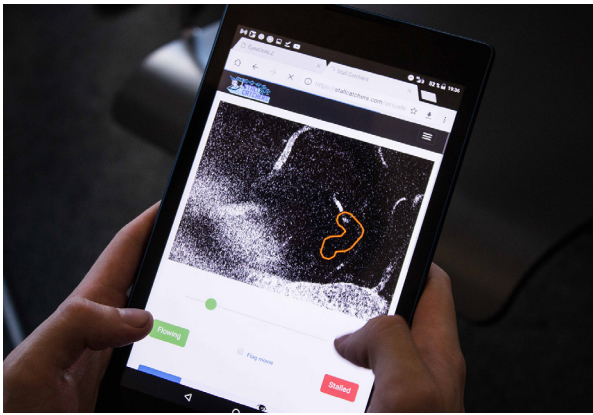

Flu Near You

Help predict flu outbreaks by sharing your symptoms online.

Globe at Night

Measure light pollution while stargazing and help protect the night sky.

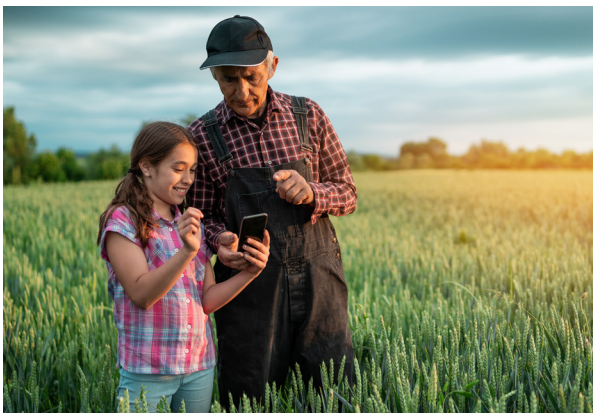

Stall Catchers

Play a simple online game and help speed up Alzheimer's research.

Debris Tracker

Use an app to report and categorize litter and help protect coastlines.

ISeeChange

Show how local weather and climate changes are impacting your community and the world.

Crowd the Tap

Join the first national survey of pipe materials to help ensure safe drinking water for all.
